

tḅt

design Roberto+Ludovica Palomba

“We designed a towel rail that becomes an individual item if one wishes to include it in other rooms besides the bathroom. Specifically, it's a tube, 7cm in diameter, which can be installed either vertically or horizontally. The project is based on a streamlined concept regarding bathroom heating, with small glossy design details such as the knobs etc...

TBT can also be installed as a free-standing vertical unit, enabling you to heat a specific area of the home with an extremely essential product.”

- MIXED

tbt horizontal

Watt = Kcal/h ÷ 0,860
Kcal/h = Watt x 0,860

The full price of the required TBT is calculated by summing the price of the external part (external TBT), the corresponding recessed part (recessed TBT) and the price of only one Remote Valve Assembly (GVR), VAT and transport costs are not included

PRICE ONLY FOR THE EXTERNAL PART (TBT external) Includes the external TBT and everything required for installation to the recessed part (see below).
